Skills Summary

React.js | Javascript | MERN | CSS | HTML | Node.js | SQL | Express | Bootstrap | Mongoose | APIs | Auth w/ JWT | MongoDB

Summary: A Full Stack Developer who specializes in Frontend technologies across the MERN stack (MongoDB, Express, React, Node.js). Experience building complete web applications with built-in backend API systems as well as databases built from scratch.

Projects

Housed | Web Application (Full-Stack) | June 2020

- A platform that allows users to find a place to stay long-term or short-term based on preference.
- Designed and managed our own API/database for the listings rendered for cities searched in South Florida.
- Full Stack Website built using React.js, JavaScript, Node.js, CSS, and Express.
- Postman, MongoDB, and Cloudinary
- <https://gethoused.herokuapp.com/>

Brewskis | Web Application (Full-Stack) | May 2020

- A platform that allows users to search for a variety of local breweries in their desired city.
- Implemented the Yelp API to render open breweries registered and match the user input.
- Built using JavaScript, React.js, HTML, CSS, Node.js, and Express
- <https://brewskis-breweries.herokuapp.com/>

Education

Wyncode Academy | Miami, FL | June 2020 | Full Stack Web Development

Florida International University | Miami, FL | 2018 | BA in Recreations and Sports Management

Miami Dade College | Miami, FL | 2016 | AA in Exercise Science

Experience

AT&T | Store Manager / Account Manager | Miami, FL | 2016-2020

- #1 Overall Store in The State of Florida
- Ranked 11 Overall Store in the Nation
